🔑 Installing MoserBaer Crypto Token Driver

Procedure: Installation of MoserBaer crypto Token Driver to Connect VPN.

Platform: 🌐 Windows

Audience: 👷 IVFRT Users

Date: 📅 November 2025

# 🔧 1. Driver Installation Process

1.
First Time Installation

Installation of the driver has to be done for the first time and **'only once'**.

2.
Download MoserBaer Drivers

Download both driver files for MoserBaer crypto Token from the NIC VPN Services website: **'MoserBaer Token Driver for Windows 32-bit'** and **'MoserBaer Token Driver for Windows 64-bit'**.

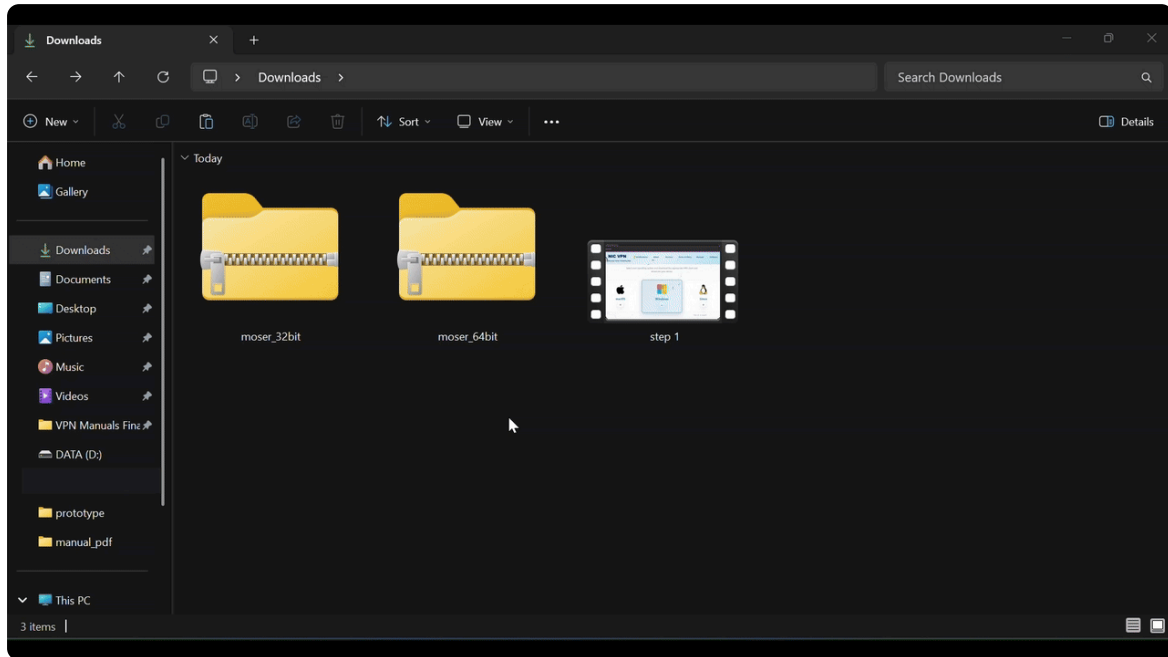

Download both 32-bit and 64-bit drivers.

3.

Run Appropriate Installer

From the driver folder, double-click to install the appropriate file based on your system architecture (e.g., `moser_64bit.exe` or `moser_32bit.exe`).

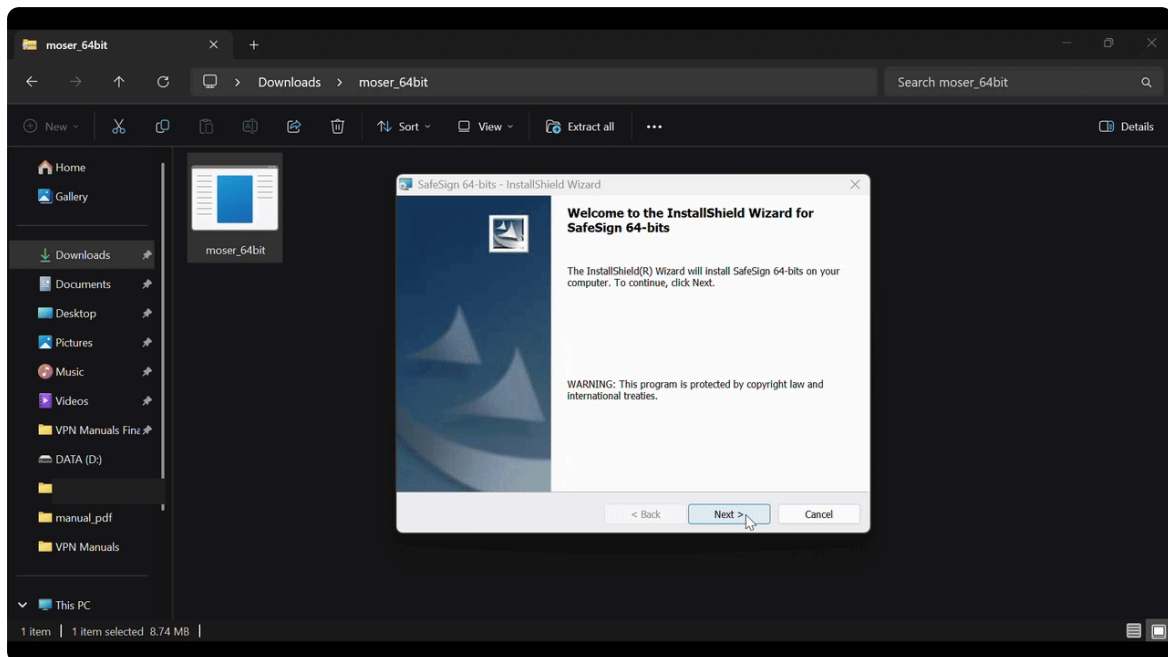

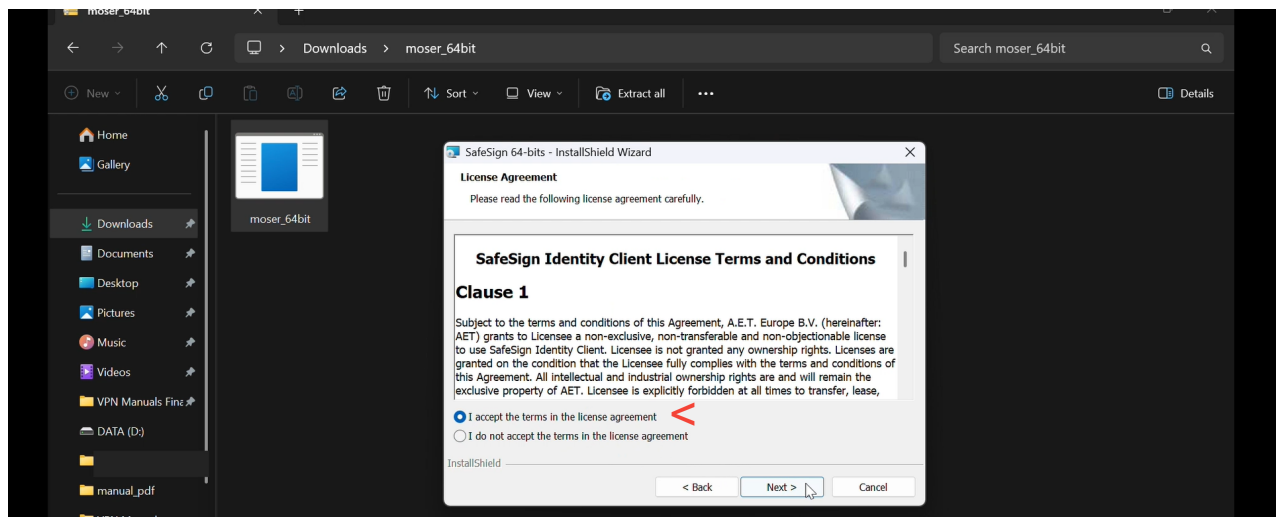

Run the appropriate installer file.

## 4.

Complete Installation Wizard

Click **'Next'** through the InstallShield Wizard, select **"I accept the terms in the license agreement"**, and click **'Install'**. Once finished, click **'Finish'** to exit.

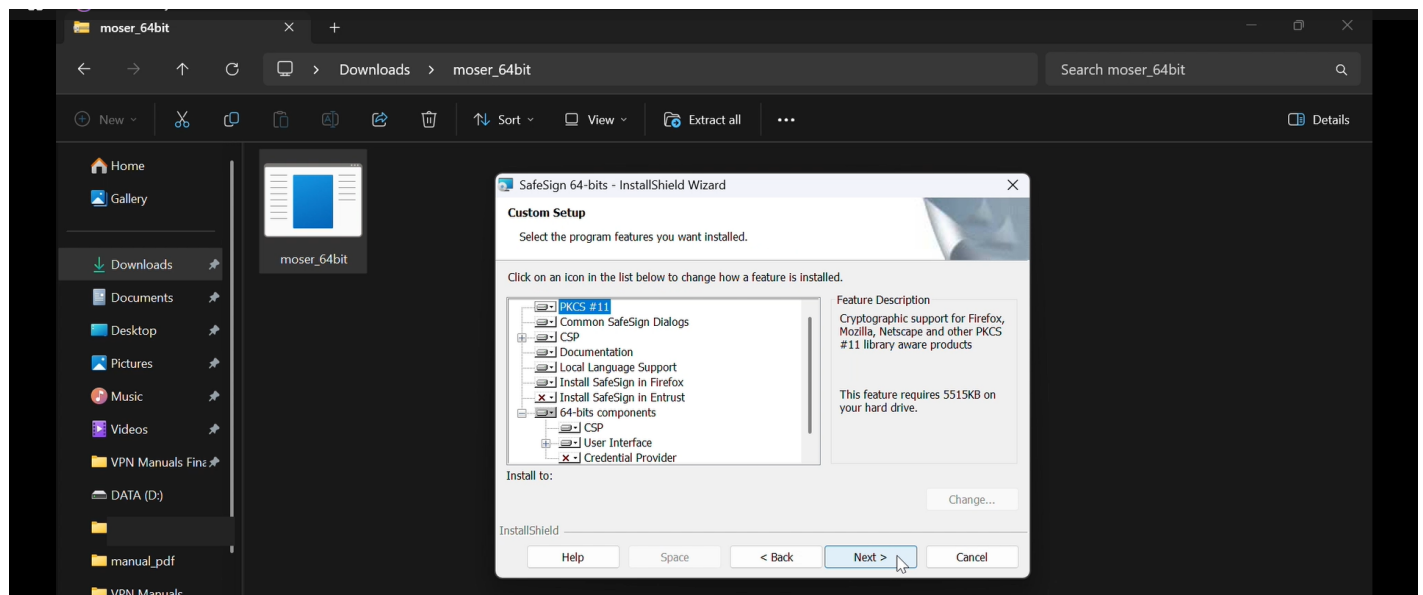

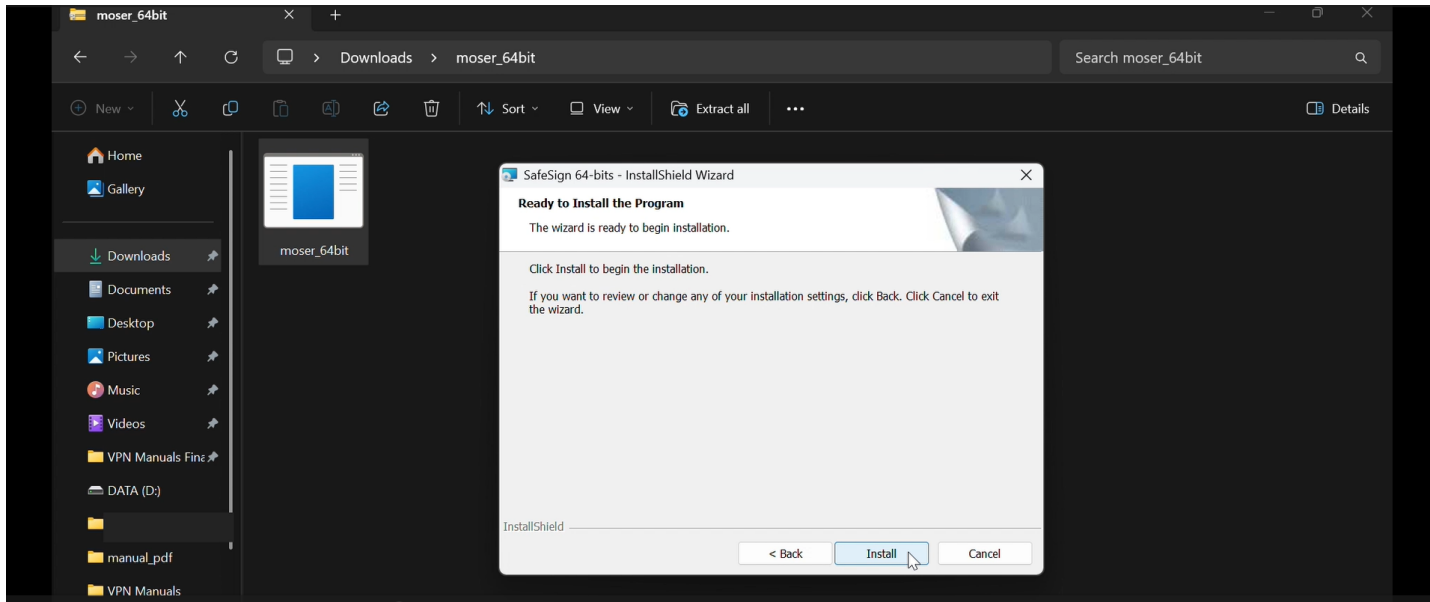

Click Next

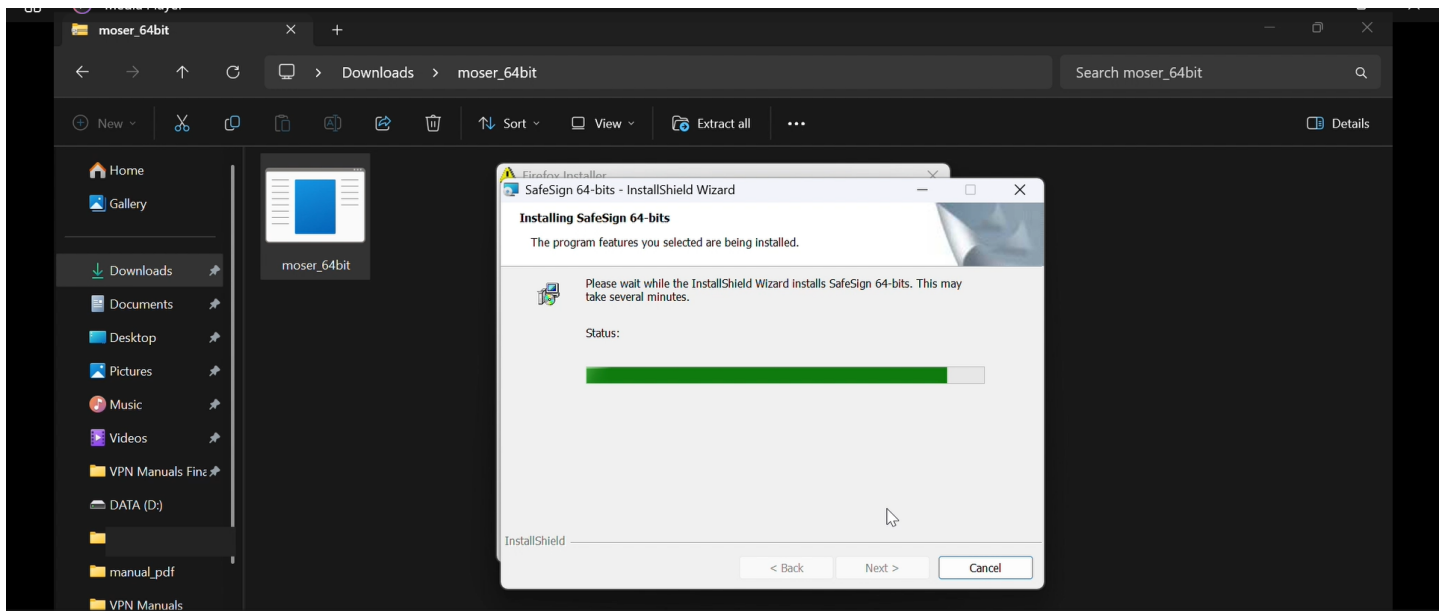

Accept 'agreements' then click 'Next'

Click 'Next'

Click 'Next' again

Click 'Install'

Wait to finish the setup

Click 'Finish '

1.
Verify Operational Status

> After installing **'MoserBaer Driver'** , **'Reboot'** the system first.

> Open the **'Token Administration Utility'**. Confirm that the **'Token Status'** shows **'operational'**. This confirms the driver is installed correctly and the token is ready to use.

Token Status is operational.
